

Chandreil Emerson V. Lao

BSIT401

12. Capture a screenshot of the Amazon VPC console after changing Regions. The selected AWS Region must be clearly visible. Paste your screenshot in MS Word.

14. Select one of the existing subnets. Examine the information displayed for the selected subnet.
15. Capture a screenshot showing the selected subnet with its **Subnet ID**, **VPC ID**, and **Availability Zone** visible.

16. Select **two** other existing subnets and capture screenshots showing the same information.

20. Determine which of these services are global or regional: Amazon EC2, IAM, Lambda, and Route 53.

21. Capture a screenshot for each service that provides evidence of its infrastructure scope.

Amazon EC2: Regional

The screenshot shows the Amazon EC2 console interface. The left sidebar contains navigation links for EC2, including Dashboard, AWS Global View, Events, Instances, Instance Types, Launch Templates, Spot Requests, Savings Plans, Reserved Instances, Dedicated Hosts, Capacity Reservations, Capacity Manager, Images, AMIs, AMI Catalog, Elastic Block Store, Volumes, and Snapshots. The main content area displays the 'Resources' section for the Europe (London) Region, listing various EC2 resources and their counts. A 'Launch instance' button is visible, along with a 'Service health' section indicating that the service is operating normally. The right sidebar shows the 'EC2 cost' section, including a date range of 'Past 6 months', a total cost of '\$0.00', and a cost graph.

Resources					
Instances (running)	0	Auto Scaling Groups	0	Capacity Reservations	0
Dedicated Hosts	0	Elastic IPs	0	Instances	0
Key pairs	0	Load balancers	0	Placement groups	0
Security groups	1	Snapshots	0	Volumes	0

IAM: Global

The screenshot shows the Amazon IAM console interface. The left sidebar contains navigation links for Identity and Access Management (IAM), including Dashboard, Access Management, Roles, Policies, IAM users, IAM user groups, Identity providers, Account settings, Root access management, Temporary delegation requests, Access reports, Access Analyzer, Resource analysis, Unused access, Analyzer settings, and Policy simulator. The main content area displays the 'IAM Dashboard' for the AWS Account, showing a summary of IAM resources (User groups, Users, Roles, Policies, Identity providers) and a 'What's new' section with updates for features in IAM. The right sidebar shows the 'AWS Account' section, including the Account ID, Account Alias, and a sign-in URL for IAM users in this account.

IAM resources				
User groups	Users	Roles	Policies	Identity providers
0	1	15	1	0

Lambda: Regional

The screenshot shows the AWS Lambda console interface. At the top, there's a navigation bar with the AWS logo, a search bar, and account information (Europe (London), Account ID: 6355-2854-4355). The main header area is dark blue with the text 'Compute' and 'AWS Lambda Run code without managing servers.' Below this, a 'Get started' box contains the text 'Bring your own code, or choose a ready-to-deploy example.' and a 'Create a function' button. The 'How it works' section shows a code editor with a Node.js example function. The code is as follows:

```
1 * exports.handler = async (event) => {
2   console.log(event);
3   return 'Hello from Lambda!';
4 }
5
```

Buttons for 'Run' and 'Next: Lambda responds to events' are visible.

Route 53: Global

The screenshot shows the AWS Route 53 console interface. At the top, there's a navigation bar with the AWS logo, a search bar, and account information (Global, Account ID: 6355-2854-4355). The main header area is dark blue with the text 'Network & Content Delivery' and 'Amazon Route 53 A reliable way to route users to internet applications'. Below this, a 'Get started with Route 53' box contains the text 'Get started by registering a domain, configuring DNS, or using another Route 53 feature.' and a 'Get started' button. The 'Pricing (US)' section has a 'View pricing' link. The 'How it works' section features a diagram showing a user's device connected to a cloud icon labeled 'Amazon Route 53' and a globe icon. The 'More resources' section lists links for 'Documentation', 'API reference', and 'FAQs'.
